

Percentage of views by category

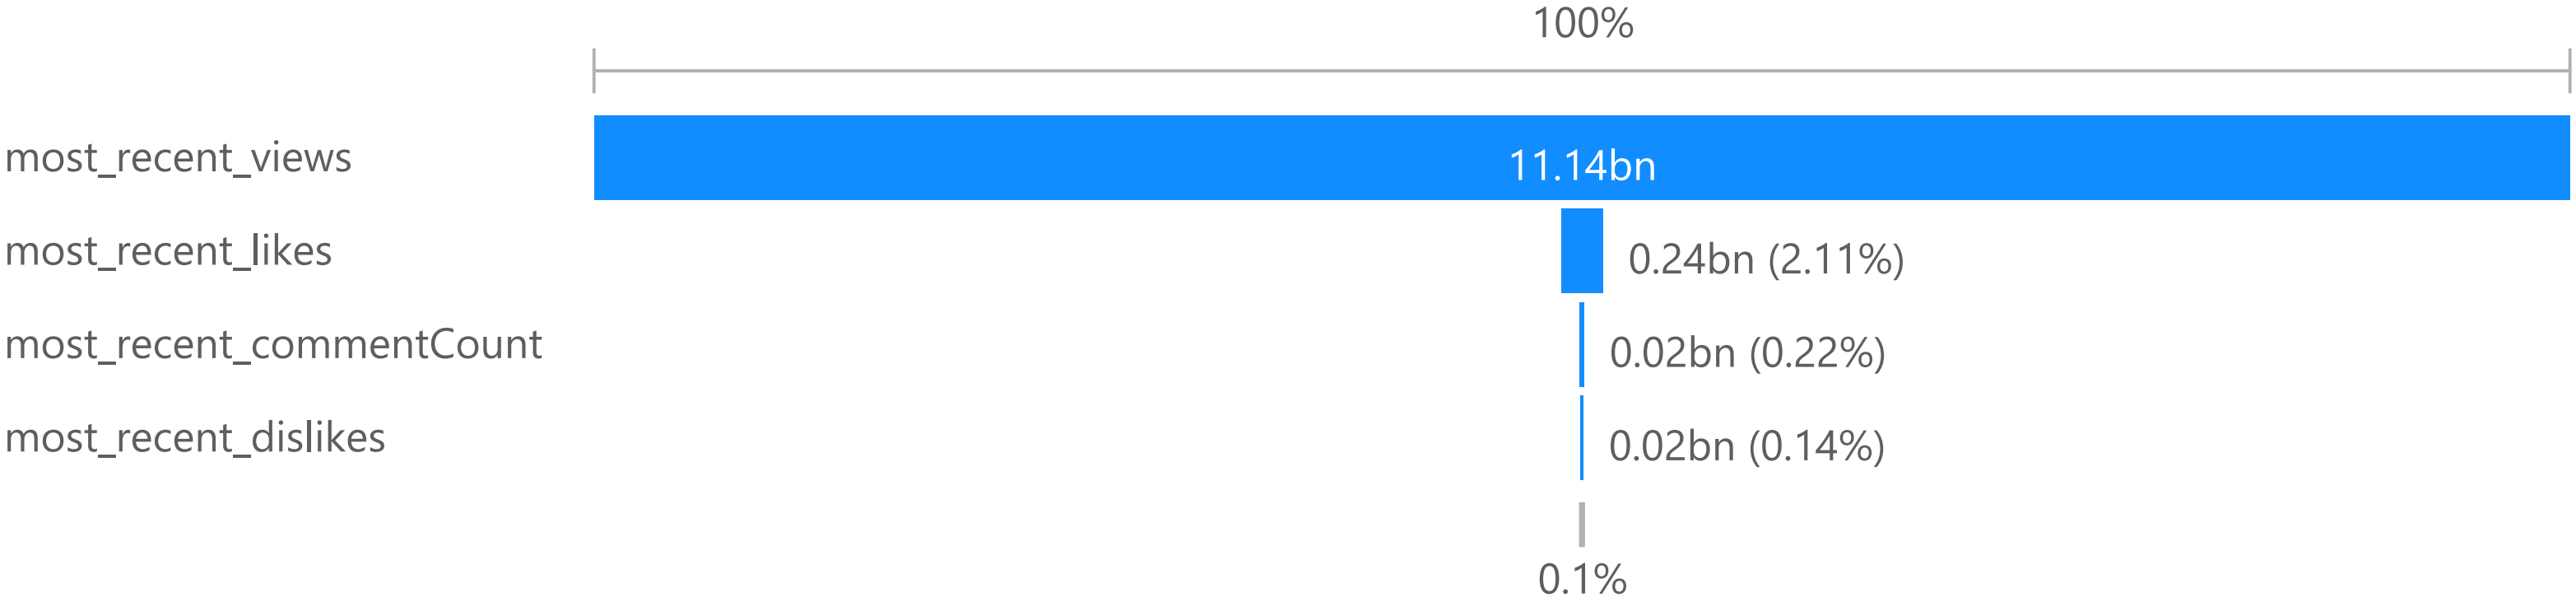

Percenatge of likes by category

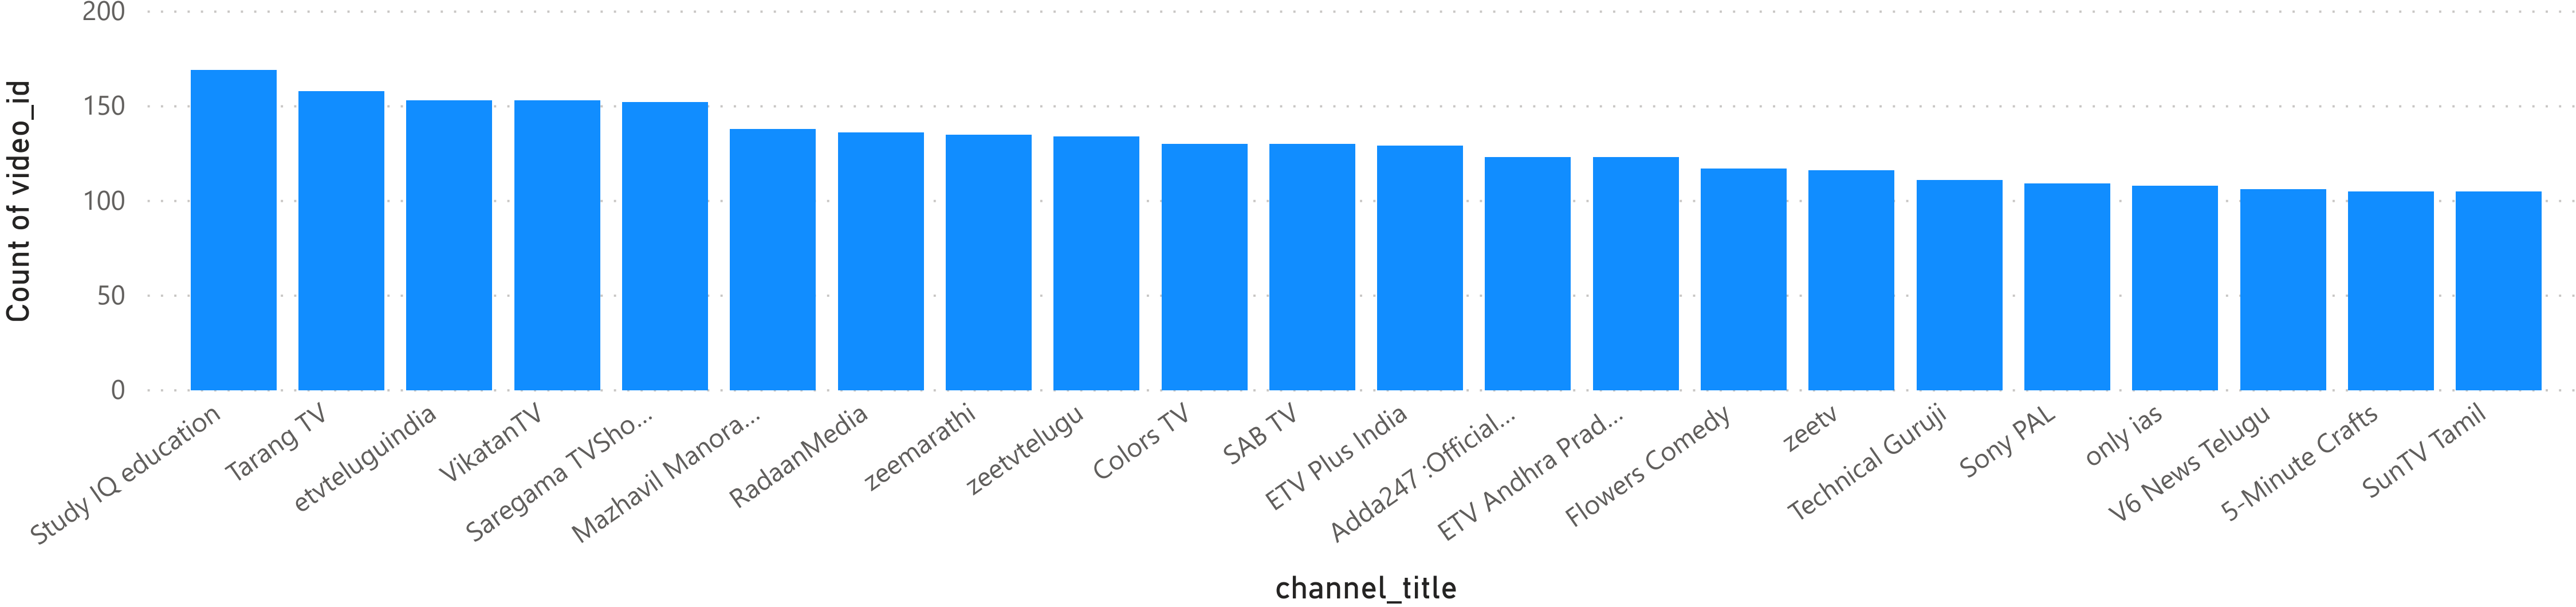

Music and entertainment are two majorly watched and liked videos in India. While Comedy has low viewership of only 7.18% it accounts for 16.49% of likes, more than double. Showing it has higher views to like ratio.

Views converted to likes

Views to like ratio is very less showing people most often just watch the videos and not like comment or dislike the video. It also shows that one video is watched multiple times by the same user.

Count of video\_id by channel\_title

The graph depicts maximum number of trending videos by a channel in India. As it shows through this graph it mostly consists of television giants and educational channels. This could be possible because they release more content thus having a better chance to get trending. So if you are a aspiring youtuber regular content upload is a required.
